

# HONG KONG

As Hong Kong directly adopts European standards in terms of emissions, noise and safety, the test reports granted by EU or the Economic Commission for Europe (ECE) are acceptable in the region.

## BENEFITS

TÜV Rheinland Greater China has extensive experience and effective technical teams in the fields of EC/ECE testing and certification. We enjoy long-term strategic partnerships with authoritative test institutes in Hong Kong. Our outstanding experts have been authorised by European countries and are thus able to implement the majority of testing projects domestically. These advantages help reduce testing costs for enterprises and shorten testing periods, thereby making the products go to market faster.

## SERVICE INTRODUCTION

As a free port, Hong Kong pursues a free trade policy and maintains no barriers to trade. TÜV Rheinland's test report is widely accepted around the world. We support manufacturers in the process of applying for vehicle registration certificates and license plates.

## PRODUCT SCOPE

- Motor vehicles of categories M, N, O
- Motorcycles

## SERVICE PROCEDURES

- 1 Emission and noise approval
- 2 Import declaration application
- 3 Vehicle testing examination
- 4 Taxation, registration and licensing

## TÜV Rheinland, your reliable partner.

TÜV Rheinland Greater China has more than 20 years of professional experience in automotive certification. We provide our customers with flexible and high-quality services, guaranteeing the safety and reliability of your vehicle and system as well as conforming with the requirements of your target market.

- One-stop service
- Strong service network worldwide
- A gatekeeper of quality and standards
- Your brand enhancement with authoritative endorsement
- Commitment to supporting your sustainable growth

# CHINA MAINLAND

China implemented CCC certification for automobile components on 1 December 2005, according to CNCA announcement #137. The country is the largest market for automobiles — and we help component manufacturers follow CCC requirements and thus export their products to China.

### BENEFITS

We are the largest service provider for automotive component CCC approvals, and you may benefit from our long-term relationships with China certification bodies and local authorized test labs.

### SERVICE INTRODUCTION

We support you at every stage of the certification process, from application to certificate issuance, and also provide standard and regulation interpretation to keep you well updated with the latest information.

### LEGAL PRINCIPLES/STANDARDS

CCC implementation rules and relevant GB test standards.

### PRODUCT SCOPE

- Motor vehicles of categories M, N, O
- Motorcycles
- Motorcycle engines
- Helmets for motorcycle users
- Safety belts
- Child restraint systems (safety seats)
- Horns
- Exterior lighting and light-signal devices
- Brake hoses (hydraulic/pneumatic/vacuum)
- Devices for indirect vision (rearview mirror)
- Interior trimming material
- Seats and head restraints
- Fuel tanks (metal/plastic)
- Door locks and door retention components
- Safety glass
- Tires
- Retro-reflective markings
- Vehicle travelling data recorders
- Vehicle alarm systems

### SERVICE PROCEDURES

- 1 Application
- 2 Sample testing
- 3 Factory inspection
- 4 Certificate issuance and mark permission
- 5 Follow-up factory inspection by certification body

# TAIWAN

Vehicles and their components can only be sold in Taiwan if they are certified by the appropriate approval authorities.

### BENEFITS

Our test reports are widely accepted by authorities based on our accredited labs worldwide. We communicate extremely effectively with test labs and relevant authorities around the globe using local language.

### SERVICE INTRODUCTION

We are technical service and test labs accredited by the Ministry of Transportation and Communication for vehicle and component safety standard approvals. We are able to perform tests and issue test reports according to VSCC standards. Our experts have over 10 years of experience helping manufacturers through the entire approval process, advising on standards and supporting the R&D phase.

### LEGAL PRINCIPLES/STANDARDS

- Ministry of Transportation and Communications: Vehicle safety testing directions
- Environmental Protection Administration: Emission and noise standards
- Bureau of Energy: Fuel consumption standards

### PRODUCT SCOPE

- Motor vehicles of categories M, N, O
- Motorcycles
- Lamps
- Glass
- Rear view mirrors
- Seat belts
- Horns
- Tires

### SERVICE PROCEDURES

- 1 Initial assessment
- 2 Testing in our accredited lab
- 3 Test report submission
- 4 Certificate issuance
