# TÜV Rheinland Group

TÜV Rheinland is a leading international technical services provider with nearly 20,000 employees worldwide. Since our foundation in Germany in 1872, we have been developing solutions to promote safety, quality and sustainable development in interactions between humans, technology and the environment.

## TÜV RHEINLAND KOREA

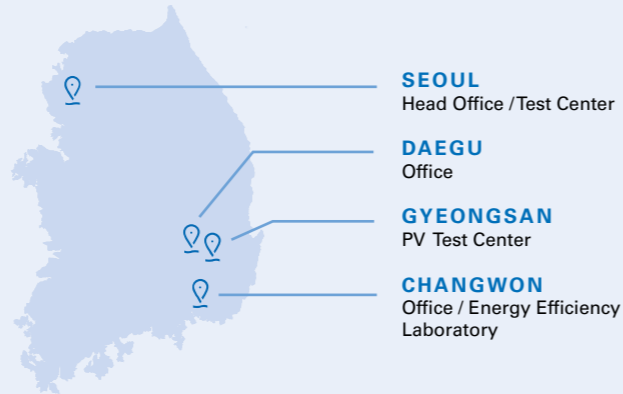

TÜV Rheinland Korea was the first foreign certification body in Korea, founded in 1987. A reliable partner for domestic companies, it provides testing, inspection and certification services for industrial services, mobility, products and systems and supports domestic firms to enter the global market.

- 2012 PV Test Center in Gyeonsan opened
- 2014 Energy Efficiency Lab in Changwon opened
- Received CBTL for PV test center
- 2015 Expanded Bluetooth test equipment
- Expanded Energy Efficiency testing scope
- 2016 LoRa® certification service launched
- EEL is KOLAS accredited
- 2017 Photobiological safety testing lab opened
- 2018 Relocation and expansion of Seoul HQ and test center to double floor space

## Our Laboratories in Korea

With state-of-the-art equipment and experienced engineers, our laboratories offer one-stop services for manufacturers and buyers around the world, in accordance with international standards and national standards of each country.

### ELECTRICAL SAFETY LABORATORY / SEOUL

The electrical safety lab conducts safety testing and performance evaluation for a wide range of products such as AV/IT equipment, household appliances. In addition we provide photobiological safety testing for lighting products, IP testing, ergonomics testing, laser testing, energy efficiency testing for household appliances.

### COMMUNICATION LABORATORY / SEOUL

The communication lab offers Wi-Fi, Bluetooth SIG, CTIA, ZigBee, WPC, AirFuel, OpenADR, LoRa certification services for mobile phones and car kits.

### PV TEST CENTER / GYEONGSAN

The PV test center provides testing and certification services according to Korean KS, IEC 61215, IEC 61646 and IEC 61730 standards for PV modules, and it has been recognized as KOLAS (ILAC MRA) and CBTL from IEC.

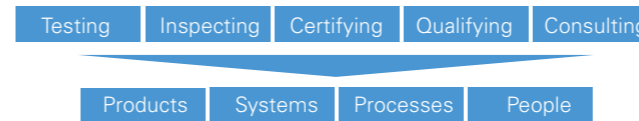

### ENERGY EFFICIENCY LABORATORY / CHANGWON

The EEL offers energy efficiency testing and performance evaluation for air conditioners, refrigerators and dehumidifiers.

## Our Services

Providing testing, inspection, certification, training and consulting services, we help customers make their products, systems, processes and people safer and more competitive.

### TESTING

We deliver the services you need to set yourself apart from the competition.

- Consulting and testing throughout the development cycle
- International certification testing for various markets
- Quality certification

We are the one-stop shop for all your testing needs, anywhere in the world.

### INSPECTION

We do the inspecting – so you can concentrate on the things that count. We make sure your vehicles, buildings, facilities and machines run safely, efficiently and profitably.

Our online inspection management relieves you from planning of testing duties.

### CERTIFICATION

Get your business ready for the future with:

- Transparent, easy-to-understand workflows
- Lean structures
- Efficient systems

Credible certification from an independent third party ensures easy access to new markets and customers.

### QUALIFICATION

Rely on a trusted training provider, and meet the challenges of today's working environment, with our range of services, including:

- Tailored concepts
- Vocational training
- Further education
- Personnel management

Enable your company to perform to the highest standards.

### TRAINING

Develop your most valuable asset – people!

- Access to our know-how whenever and wherever you need it
- Practical solutions
- Market-driven performance

Boost the scope and performance of your project teams.
